

We Build Bespoke Telecoms Solutions

By Looking At Your Needs From All Angles

Customers tell us they don't want off-the-shelf packages. So just as buildings are designed to meet a number of challenges, we create bespoke solutions that specifically match your requirements.

The Accommodation You Need

Surf provides purpose built, flexible accommodation for your equipment - whether you plan to roll-out bespoke multi-site presence across a region, or require single site accommodation.

The Customisation You Want

Surf designs and manages solutions to suit your needs. Our POP site services match those of larger data centres and telehouses, and add-ons are driven by our customers. Features include:

Security systems – Fire suppression - Managed modular accommodation - Ground space - Environmentally controlled, shared or individual floor and rack space - AC power back-up supplies – Mast space

The Capacity You Require

Surf broadens your options. We enable you to choose your connectivity, whether you require leased fibre or carrier-class bandwidth.

For more information please contact Steve Blew, Commercial Manager, telephone 01823 348 710 or email steve.blew@surftelecoms.co.uk

The Millennium Stadium, Cardiff. The tallest building in Wales: home to the Welsh rugby union team, with a capacity for 74,500 supporters and a retractable roof to protect the playing surface from the elements.
